

ARTLIVE 2011

BRUNETAREINERT

STATEMENT

Adriane Bruneta Reinert knows how to imaginatively capture the brilliance of nature and other phenomenons. The radiance of fire, water, sun, moon and lightning bolt is vividly captured in her artwork. The artist is inspired by her travels around the world and literature and other happenings. Her dense and powerful works project happiness of life and intense experiences, portraying, through its use its use of color, a soothing and invigorating effect at the same time. The often modulated works, mostly painted in oil, with a deep and brilliant application of paint, show inner and outer, almost passionate "landscapes", "events" or "nature paintings" full of energy and radiance. She tries to make people think about her work, sometimes she even tries to inspire people to feel closer to a special event , almost like being part of it. With her unique styles and color choices Adriane Bruneta Reinert successfully presents her work in her own and other galleries to inspire people with her good feelings and happiness.
